Culleoka Water Supply Corp

BACKFLOW DEVICES

Reasons for having a Backflow Device:

The backflow device on your property was installed as an integral part of your irrigation and/or water system. It is designed to prevent contaminants from entering water lines that go directly to your house and the overall water system. The Texas Commission on Environmental Quality (TCEQ) requires that the system be tested annually, at the customer's expense, and that the results be provided to Culleoka Water Supply Corp. The person performing the test must be BPAT Certified in testing and repairing backflow prevention devices.

Who needs one?

Any connection that has an irrigation system, sprinkler system or well system is required (by TCEQ) to have a backflow device installed and to be tested every year by a licensed inspector.

SC Tracking Solutions

We have partnered with SC Tracking Solutions for testing of these devices. You can go to www.sctrackingsolutions.com for more information.

I understand that my backflow device must be tested annually to remain in compliance.
